

Change energy climate

The Lowell Sun

Updated: 01/08/2013 07:16:21 AM EST

Thank you for reporting on Devan Hawkins' efforts to fight climate change.

Not all of us can go to Washington in February with Devan to picket at the White House, but we can call the White House daily asking President Obama to deny permission for the building of the Keystone XL Pipeline, which would carry the dirtiest fossil fuels to U.S. ports for export.

If people need to continue using fossil fuels, we should use cleaner ones, not those that give off the most greenhouse-gas emissions. In addition, readers should ask the president to hold a summit to consider the best solutions to climate change.
