

Letters to the Editor: Ed Markey a good choice for Senate

on October 27, 2014 at 3:32 PM

Kudos to you for [endorsing Ed Markey](#) with this important statement: "He has filed legislation on lots of unglamorous topics that matter – aging natural gas pipelines, developing a comprehensive strategy to address opioid crisis, e-cigarettes, net neutrality, broadband and children's issues."

You could have included global warming as another unglamorous topic often rated at the bottom of voter concerns. In spite of our shortsightedness, Markey has spent years trying to protect us from global warming, rising seas, and a changing climate. This is how a true leader behaves — listens to what we want, tries to give us what we say we want, but also plugs away at what we need.

Judy Weiss, Brookline
