

Letter: Lubber deserves honor for work protecting environment

[Wicked Local Brookline](#)

Posted Dec 20, 2013 @ 12:34 PM

Kudos to Brookline Public Health for choosing to [honor Mindy Lubber](#), president of Ceres, with the 2013 Public Health Leadership Award. Under Lubber's leadership, Ceres coordinated a group of large investors (pension funds, mutual funds and others) to request from fossil fuel companies and utility companies reports on what those companies are doing to reduce the risk climate change presents to their business plans, on their efforts to divest from the most carbon-intense projects and their plans to diversify into lower-carbon initiatives.

I encourage Rep. Joseph Kennedy III to recognize Ms. Lubber's career achievements protecting the environment, our health and homes, and our economic infrastructure from the threats of climate change. — **Judy Weiss, Beacon Street, member, Citizens Climate Lobby, Boston chapter**
