

Stone-cold con man

Brookline, Mass.: President Trump said our cold weather means “we could use a little bit of that good old Global Warming.” It’d be one thing if he just didn’t understand the basic scientifically proven facts of human-caused climate change and its serious risks. It’d another thing if he were incapable of understanding. But let’s face facts: Con men recognize other con men, copy each other’s ploys, and even team up. Maybe there was no collusion with Russia, but there certainly was, and continues to be, collusion with the many lying men who have pulled a major con job against Americans on behalf of the fossil fuel industry. The saddest part of all is that climate change solutions are available and easy to implement. *Judy Weiss*
