

JUDY WEISS, Brookline: Support carbon pollution tax

GateHouse Media, Inc.

Residents of West Bridgewater cheered when the zoning board rejected a proposal for a solar farm. Would those same residents have cheered if the government were not subsidizing their electric bills and home heating costs by giving fossil fuel companies huge tax subsidies and the right to pollute our air and water for free? If they had to pay the true cost of fossil fuel electricity, they would probably welcome the solar farm with open arms.

I urge readers to call and write Sen. Elizabeth Warren asking her to end oil and gas tax subsidies and support a carbon pollution tax.
