

Thank you for publishing an op-ed on evidence of climate change in Glacier National Park, melting glaciers and a carbon tax solution by Alexandra Amonette and Kristen Walser.

My brother used to work as a Park ranger in Glacier National Park. In 2002, he took me, my husband and our two teenage sons on extended hikes in the Park.

As we sat at Grinnell Glacier, he told us about the shrinking of the Park's glaciers. That was 12 years ago.

How sad that Congress has wasted so much time ignoring this problem. I urge voters in the upcoming elections to only vote for candidates who promise that they will support carbon-pricing legislation.

Thank you.
